### **Stockwell Value Proposition:**

#### **Design & Engineering**

Staff engineers comprehend design challenges and are available to help select materials and manufacturing processes that best fit specific application needs.

#### **Material Solutions**

Stockwell Elastomerics has strategically partnered with industry leaders such as Rogers Corp., Saint-Gobain, 3M, Wacker Silicones and Momentive Silicones to ensure the <u>highest quality materials</u> are used. Stockwell Elastomerics has a comprehensive inventory of engineered materials designed and manufactured to meet requirements of the most demanding gasketing applications.

Pre-Production through Manufacturing
Combining in-house CNC die cutting,
waterjet cutting, injection molding,
compression molding and adhesive
lamination with comprehensive inventory,
Stockwell Elastomerics can fulfill fast-turn
prototyping, pre-production and full
production requirements.

# **SNEF-50**

Compound: 50 Durometer Conductive Fluorosilicone Rubber with Nickel / Graphite Filler

## **Product Description:**

SNEF-50 is a fluorosilicone polymer with nickel coated graphite particle fill, giving it very good shielding and grounding properties with added chemical resistance due to the fluoropolymer. High performance and competitively priced, SNEF-50 makes an excellent option for commercial and military EMI applications.

Stockwell Elastomerics offers pre-production and full production parts made from SNEF-50, including waterjet cutting, die cutting or molding. 3M conductive adhesive backing is also available for cut parts and select molded parts.

Property	Typical Value
Durometer, Shore "A", (+/- 5)	51
Volume Resistivity, ohm-cm	0.02
Tensile Strength, minimum, psi	130
Elongation, min %	200
Tear "B", min ppi	33
Temperature Low, °C (°F)	-55 (-67)
Temperature High, °C (°F)	200 (392)
Specific Gravity	2.12
Color	Dark Grey
Mil-G-83528	N/A
Available Configurations	Sheets     Cut Parts (Waterjet/Die Cut)     Molded Parts     Conductive Adhesive Backed
