

MG Absorption Sheet (MG-02A)

High-performance Absorption Sheet Mixed with Metal Magnetic Materials

- Effective for suppressing radiation noise when attached to cables, enclosures and ICs such as CPUs.
- Flexible and easily attached.
- Available with and without Pressure Sensitive Tape.
- Custom cutting and processing available upon request.

Specifications

Product Name	MG Absorption Sheet
Grade	MG-02A
Thickness * (mm)	0.25, 0.5, 1.0
Permeability	22 @ 10MHz
Volume Resistivity ($\Omega \cdot \text{cm}$)	1×10^6
Tensile Strength (Mpa)	5
Flame Retardant Grade (UL94)	UL94 V-0 (exc. adhesive layer)

*Thickness 0.05 and 0.1mm of MG-02 line are also available.

Application

For electronics:

Suppression of radiation noise and prevention of malfunction and internal interference

For mobile phone:

PDA, DVC, car navigation system, office automation equipment, and so on.

Property
