R10400M

Flame Retardant Silicone Sponge Rubber

Saint-Gobain® Norseal® R10400M is a flame-retardant closed-cell sponge recognized to UL 94V-0 requirements. R10400M utilizes the high consistency silicone rubber (HCR) chemistry. This provides superior mechanical strength properties such as improved tear strength, abrasion resistance and tensile strength over other silicone rubber systems. The material is flexible and compressible with excellent weatherability and non-stick properties. In addition, R10400M is post-cured to minimize volatiles for a clean gasketing application.

Norseal R10400M is specially designed to provide the following features:

- Capable of meeting AMS 3195 closed-cell specification
- Excellent compression set resistance
- Maintains its resiliency even under extended compression
- Capable of meeting ASTM D6576 Type 2, Grade B and Grade C/ASTM D1056 Type 2, Class A and D, Grade 2/3

### Norseal R10400M – Properties

(Formerly known as CoHrlastic R10400M)

Performance tests are run using standard test procedures. The values presented are typical values and should not be used for specification purposes.

### Environmental

- Water Absorption: % ASTM D471 1%
- FDA Extractable (Food Contact) 21 CFR 177.26 Pass

### Flammability

- Flame Rating UL 94 V-0
- Flame Spread Index ASTM E162 Class B
- Smoke Density ASTM E662 Pass
- Toxic Gas Emissions Rating SMP-800C Pass
- Euro Fire Protection (Rail) DIN5510-2 Pass

### Electrical and Thermal Properties Reference

- Dielectric Constant ASTM D150 1.78
- Dielectric Strength: volts/mil ASTM D149 200
- Volume resistivity: ohm-cm ASTM D257 $10^{15}$
- Thermal Conductivity: W/m K ASTM E1530 0.14

### Options (subject to minimum order requirements)

Acrylic or silicone pressure-sensitive adhesive (PSA) available in sheet format only.

### Important Instructions

- Because Saint-Gobain cannot anticipate or control every potential application, we strongly recommend testing of this product under individual application conditions prior to commercial use.
- Surfaces must be clean and free of oil, grease, moisture, dust and dirt. Isopropyl alcohol is good for cleaning the surface. Do not remove liner until tape is in proper position. Avoid touching adhesive surface before application.
- Recommended service temperature of base sponge is -100°F to 500°F (-73°C to 260°C).

### Shelf Life

10 years after the date of sale for base material when stored in original packaging at temperatures up to 70°F (21°C) and 50% relative humidity (see the applicable data sheets for pressure-sensitive adhesive options).
