June 1, 2021

Dear Valued Customer,

Rogers Corporation is seeing encouraging signs of increasingly robust economic activity across a broad range of markets. Driven by a global recovery from the COVID-19 recession that began in early 2020, the strong demand is indicative of our resilience and resolve to more fully emerge from the COVID-19 pandemic.

At present, however, the increased demand exceeds our ability to operate certain manufacturing assets as these assets are being unfavorably impacted by both supply chain disruptions and employee outages due to COVID protocols.

The resulting backlog has created a need to further extend lead times on certain BISCO products as follows:

Product Family	Lead Time
BISCO foams: BF2000, BF1000, HT870, HT800, HT820, HT840, RF120, IF200, FPC, L3, and all other foam products	Formerly 8 weeks, Now 20 weeks
BISCO solids: HT6000-series, HT200	Formerly 8 weeks, Now 20 weeks

Please direct any questions to your Rogers Customer Service Representative or Regional Sales Engineer.

Sincerely,

A handwritten signature in black ink, appearing to read 'David Timpe', written in a cursive style.
