Job Title: ERP Super User / Teacher / Implementer / Manager

Accountability - Reports to V.P. of Technology

Job Summary - This position could be short term working in conjunction with your current position or a long term, career growth opportunity, working directly with V.P. of Technology & Quality and other Stockwell Elastomerics associates within the organization to ensure the successful implementation, ongoing support, and future enhancements of the newly selected Deacom ERP system.

Duties and Responsibilities

- Serve as a key member on the Deacom ERP Implementation Lead Team and drive the successful implementation of this ERP system in the second half of 2021.
- Bring experience with traditional ERP System to the Stockwell Elastomerics team. The first phase of the position is a **hands on** implementation role ensuring that the GO LIVE is seamless for our customers and our associates.
- Design and facilitate functional area training sessions for business critical activities in the ERP environment.
- In later phases - Act as the key liaison across all key functional areas such as production, sales, customer service and finance, providing recommendations for improved system processes, customized reports and application enhancements.
- Develop standard work for primary business processes within the DEACOM ERP environment.
- Responsible for creation and maintenance of use policies and procedures for the newly developed ERP system.
- Assist with defining integration requirements between ERP and other system applications and assist with development and testing efforts.
- Responsible for developing (with key users) and maintaining custom reports, user defined fields and forms within the system. (Pre-Go Live and Post-Go Live continuous improvement).
- Participate in the development and implementation of strategies for upgrade, expansion, continuous improvement, life cycle, and preventive maintenance of the Deacom ERP system.
- Seek out business efficiencies that can be gained through systems, utilizing outside best practices.
- Coordinate activities with outside consultants and vendors, as necessary.

Experience and Education Requirements

Experience:

- Implementation experience with manufacturing and distribution oriented middle market ERP products.
- In depth knowledge of MRP and ERP systems such as Deacom ERP or a similar system.
- Knowledge of manufacturing industry best practices and current trends.

Education:

- Bachelor's Degree (or equivalent experience) in computer science, MIS, finance, accounting, supply chain, industrial /other engineering.

Inter-Relationships

- Ability to interact and work with all levels within the organization. Strong interpersonal and customer service skills.
- Team player with skills for partnering with both technical and non-technical users.
