Stockwell Elastomerics Launches New Website with a Better User Experience and Enriched Content

Stockwell Elastomerics, Inc. announces the re-launch of its website <https://www.stockwell.com>. The new version of the website has a new wider format with improved ease of navigation, and brings forward all of the rich content that has made the Stockwell Elastomerics website a strong industry resource.

Philadelphia, PA, September 12, 2018 - Stockwell Elastomerics announces the re-launch of its website <https://www.stockwell.com>. This enhanced website features a new wider format for better viewing on larger screens, while maintaining its easy viewing on the smaller screens of mobile devices. Further, the site navigation has been updated for better usability, while the new design and layout adds visual appeal.

All of the rich content that has made the Stockwell Elastomerics website a valuable industry resource for over 15 years has been retained and improved in the new website. The Gaskets & Pads section, organized by type, function and manufacturing processes, has been updated, and the long-running, popular Elastomerics Blog (<https://www.stockwell.com/blog/>) continues with its informative technical insights and industry news. Also, the sections on materials, data sheets, industries and tech tips are continually updated.

“This new version of our website makes it easier for our customers to find the products and services we offer, and information they need to easily determine if we can provide what they need and then contact us to make an inquiry,” said Stockwell Elastomerics’ President Bill Stockwell.

About Stockwell Elastomerics, Inc.

Stockwell Elastomerics’ core competence is the fabrication and molding of silicone rubber and many other high performance elastomers. On-site production capabilities include adhesive lamination, slitting, die cutting, water jet cutting and custom molding. Many Stockwell Elastomerics customers take advantage of water jet cutting and flash cutting for fast turn prototypes and initial production. Stockwell Elastomerics is ISO 9001:2015 registered.
